## **Preamble** About this course

## CentraleSupélec

Control Science (AUT)

Romain Bourdais

### **Course Outline**

- · PID: The most famous control
- Feedforward Control
- Non trivial Feedback
- Parallel compensation

PID: The most famous control

Commande feedforward

Non trivial Feedback

Parallel compensation: tachometric feedback

## **Outline**

1 Introduction

2 PID : The most famous control

3 Commande feedforward

**4** Non trivial Feedback

**5** Parallel compensation : tachometric feedback

6 Conclusions

Control Science (AUT)

Romain Bourdais

Introduction

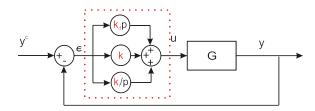

PID : The most famous

Commande

Non trivial Feedback

Parallel compensation : tachometric feedback

## A few words about PID Definition

- Parallel compensation, but should be seen as a serial action!
- Three setting parameters : k, k<sub>i</sub>, k<sub>d</sub>
- (There is a fourth parameter often hidden ...)

$$C(p) = k + \frac{k_i}{p} + k_d p,$$
  $C(p) = K \left( 1 + \frac{1}{T_i p} + T_d p \right)$ 

Control Science (AUT)

Romain Bourdais

Introduction

PID : The most famous

Commande feedforward

Non trivial Feedback

Parallel compensation : tachometric feedback

Study according to the values of  $T_i$  and  $T_d$ 

$$C(p) = K\left(1 + \frac{1}{T_i p} + T_d p\right) = K\left(\frac{1 + T_i p + T_i T_d p^2}{T_i p}\right)$$

Control Science (AUT)

Romain Bourdais

Introduction

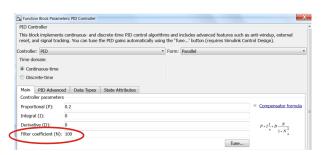

PID : The most famous

Commande feedforward

Non trivial Feedback

Parallel compensation : tachometric feedback

## A few words about PID Let us have a look in Matlab

• The fourth parameter is a filter (feasibility of the derived action)

Romain Bourdais

#### Introduction

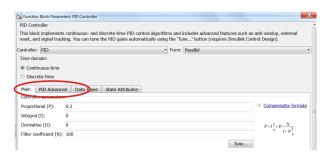

PID : The most famous control

Commande feedforward

Non trivial Feedback

Parallel compensation : tachometric feedback

## A few words about PID Let us have a look in Matlab

There are many advanced settings

Romain Bourdais

#### Introduction

PID : The most famous control

Commande feedforward

Non trivial Feedback

Parallel compensation : tachometric feedback

# A few words about PID Let us have a look in Matlab

- Importance of saturation: significant performance losses!
- Possibles strategies : anti wind-up, ...

Control Science (AUT)

Romain Bourdais

Introduction

PID : The most famous control

Commande feedforward

Non trivial Feedback

Parallel compensation : tachometric feedback

## The OLD-SCHOOL Zigler-Nichols method (https://fr.wikipedia.org)

Méthode de Ziegler-Nichols <sup>1</sup>			
Type de contrôle	$K_p$	$K_i$	$K_d$
P	$K_u$ 2	-	-
PI	$K_u/2.2$	$K_p(T_u)$ 1.2	-
PID classique <sup>2</sup>	$0.60K_u$	$2K_p/T_u$	$K_pT_u/8$
Pessen Integral Rule <sup>2</sup>	$0.7K_u$	$2.5K_p/T_u$	$0.15K_pT_u$
quelques dépassements <sup>2</sup>	$0.33K_u$	$2K_p/T_u$	$K_pT_u/3$
pas de dépassement <sup>2</sup>	$0.2K_u$	$2K_p/T_u$	$K_pT_u/3$

- K<sub>u</sub>: limit gain for closed-loop stability
- For this limit, oscillating behavior: T<sub>u</sub> is the pseudo-period of these oscillations

Control Science (AUT)

Romain Bourdais

Introduction

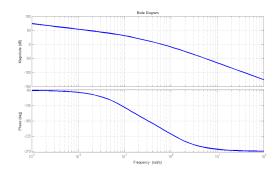

PID : The most famous

Commande feedforward

Non trivial Feedback

Parallel compensation : tachometric feedback

## The OLD-SCHOOL Zigler-Nichols method: let's try!

• What is the value of the limit gain  $K_u$ ?

Control Science (AUT)

Romain Bourdais

Introduction

PID : The most famous

Commande feedforward

Non trivial Feedback

Parallel compensation : tachometric feedback

The OLD-SCHOOL Zigler-Nichols method: let's see what happens!

Control Science (AUT)

Romain Bourdais

CentraleSupélec

Introduction

PID : The most famous

Commande feedforward

Non trivial Feedback

Parallel compensation : tachometric feedback

## The OLD-SCHOOL Zigler-Nichols method: let's do better!

Specifications: same rise time, but 20% overshoot.

Control Science (AUT)

Parallel compensation : tachometric feedback

# A few words about PID Conclusion

Control Science (AUT)

Romain Bourdais

#### Introduction

PID : The most famous

Commande feedforward

Non trivial Feedback

Parallel compensation : tachometric feedback

Conclusions

What to remember

- Most used industrial controller
- 3(4) setting parameters
- $T_i = 4T_d$
- · Can affect accuracy, speed and stability
- Existence of heuristics for tuning (not necessarily effective)

## **Outline**

1 Introduction

2 PID : The most famous control

3 Commande feedforward

4 Non trivial Feedback

**5** Parallel compensation : tachometric feedback

6 Conclusions

Control Science (AUT)

Romain Bourdais

PID : The most famous control

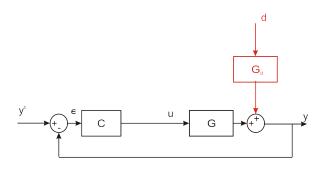

Commande feedforward

Non trivial Feedback

Parallel compensation : tachometric feedback

### Problem statement - example of a disturbance

• Knowledge of a disturbance, supposedly measured

Control Science (AUT)

**Romain Bourdais** 

Introduction

PID : The most famous control

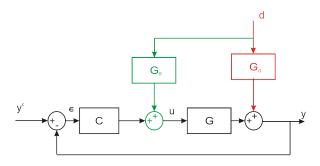

Commande feedforward

Non trivial Feedback

Parallel compensation : tachometric feedback

### Problem statement - example of a disturbance

• Construction of a controller to anticipate this disturbance

• How to build  $G_{ff}$ ?

Control Science (AUT)

Romain Bourdais

Introduction

PID : The most famous control

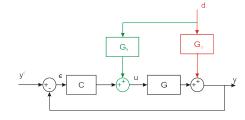

Commande feedforward

Non trivial Feedback

Parallel compensation : tachometric feedback

#### Problem statement - example of a disturbance

How to build G<sub>ff</sub>?

We have

$$Y(p) = G(p)U(p) + G_d(p)D(p)$$

· Which leads to:

$$G_{\rm ff}=-rac{G_d}{G}$$

#### Control Science (AUT)

Romain Bourdais

#### Introduction

PID : The most famous control

## feedforward

Non trivial Feedback

## Parallel compensation : tachometric feedback

#### Problem statement - example of a disturbance

$$G_{ff} = -rac{G_d}{G}$$

### 1st remark: feasibility

- Be careful about the feasibility of the controller!
- Add filters if necessary

## 2nd remark: stability

- Be careful with the stability of the corrector!
- Do not add unstable poles
- Beware of the zeros of G(p)!

Control Science (AUT)

Romain Bourdais

Parallel compensation : tachometric feedback

Carabasiana

## **Expected skills**

- Understand the PID, its settings, the effect of the parameters
- Do not limit yourself to the single feedback: Tachometric feedback feedback, Feedforward
- Have the basics to analysis any type of correction
